

The diagram illustrates the layout for a 3-Layer 3D Mask on the left side. It features three concentric, rounded rectangular boundaries. The innermost boundary is a dashed green line representing the Safety Margin. The middle boundary is a solid red line representing the Trim Line. The outermost boundary is a solid black line representing the Bleed Line. The text and legend are positioned within the Safety Margin area.

## 3-Layer 3D Mask - Left Side

-  = Safety Margin, keep all important elements within this line.
-  = Trim Line, edge of the mask
-  = Bleed Line, any bled artwork must have the bleed extended to this line.

**\* Please delete all non-printing elements and use the Bleed Line to mask out your artwork before saving to a print file.**
